COMPLEJIDAD CICLOMÁTICA

Se puede calcular de las siguientes formas:

- V(G) = número de nodos predicados(decisiones)+1
  V(G)=12+1=13
- V(G) = A – N + 2
  V(G)= 38– 27 + 2 = 13

DONDE:
P: Número de nodos predicado
A: Número de aristas
N: Número de nodos

COMPLEJIDAD CICLOMÁTICA

Se puede calcular de las siguientes formas:

- V(G) = número de nodos predicados(decisiones)+1
  V(G)=12+1=13
- V(G) = A – N + 2
  V(G)= 38– 27 + 2 = 13

DONDE:
P: Número de nodos predicado
A: Número de aristas
N: Número de nodos
